COMPANY FOR PRODUCTION AND SALE OF HARD METAL TOOLS AND STEEL TOOLS

## HISTORY

Company MTK Metal-komerc d.o.o. was established in January 1990 as a workshop for producing rivets and nails. Using his long experience in the manufacture of hard metal tools, the owner Mihailo Selaković, directs the production of the special tools according to customer needs.

From 1996, MTK Metal-komerc operates as a COMPANY FOR PRODUCING AND SALE OF HARD METAL TOOLS AND STEEL TOOLS.

In 2006 MTK Metal-komerc bought the company "Tvrdi metal" in bankruptcy, which was part of a great company "Prvi partizan" Užice. The carbide tools continue the long-standing tradition of tool making in the "Prvi partizan". The production orientation of powder metallurgy has led to a program for the production of hard metal tools. The first tools, drawing dies, made of hard metal, were produced in 1966. This is the beginning of the work of the hard metal factory in the "Prvi partizan", and today's MTK Metal-komerc d.o.o.

For a short time, MTK Metal-komerc d.o.o. grew into a modern factory. Of the approximately 90 employees, it has a significant number of professional, educational personnel of different profiles.

Very modern equipment of the world's most famous and domestic manufacturers, modern control devices, create conditions to answer even the most complex requirements regarding the complexity, accuracy and quality of the tools. Production program is so focused that covered almost the entire product range of carbide which is now produced in the world.

For over 25 years, our products have been used by a large number of foreign and domestic customers. Through continuous engagement in conquering new products, maintaining and improving quality, MTK Metal-komerc strives to justify the gained trust. Special attention is paid to the purchase of modern CNC equipment, in order to improve the quality of products and services.

In December 2012, MTK Metal-komerc bought the company "Rujno" in bankruptcy, in Bela Zemlja, about 6 km away from Užice. In May 2013 entire production and administration was moved to a new, renovated building. Business and production building has an area of 25000m<sup>2</sup>, with a green area of 40000m<sup>2</sup>.

Description and Code Activities: **Production of tools**

VAT: 101505454 | Ownership: Private | Company Owner: Mihailo Selaković

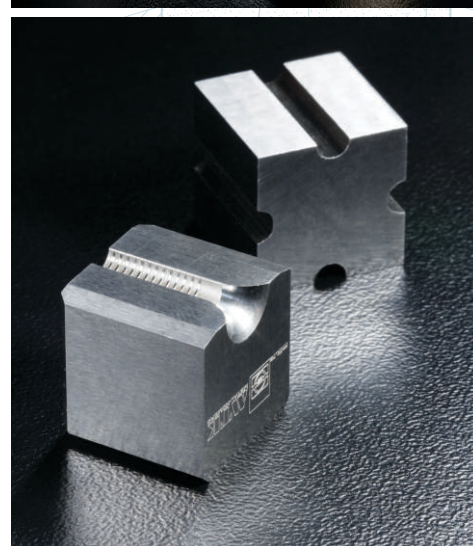

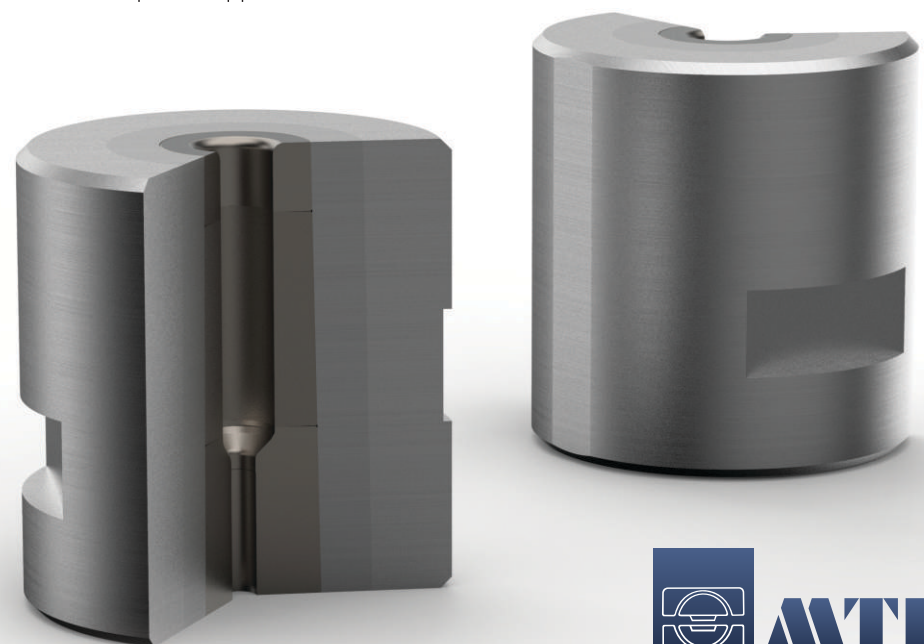

## HARD METAL PROPERTIES

As a material of superior properties, regarding the strength, hardness, the abrasion resistance, corrosion resistance, high temperature effects ..., the use of hard metal is the necessary condition for improving processing technology, and more economical production of high quality products.

The exceptional properties of hard metal were formed by combining very hard carbide particles: tungsten carbide (WC), tantalum (TaC), niobium (NbC) and titanium (TiC) and binding metal - cobalt (Co).

Production of hard metal is a highly specialized process that includes a large number of chemical, metallurgical and mechanical operations. In order to ensure the best quality of its products, MTK Metal-komerc imports hard metal blanks exclusively from renowned European suppliers.

## PRODUCTS

### DRAWING TOOLS (DIES AND MANDRELS)

MTK Metal-komerc d.o.o produces all kind of drawing dies, round, square, hexagonal and special shapes.

1. Wire drawing dies
2. Bar drawing dies
3. Tube drawing dies
4. Special shape drawing dies
5. Drawing mandrels
6. Floating mandrels

### COLD AND HOT FORGING TOOLS

1. Cutting knives
2. Cutting and trimming dies
3. Stamping dies
4. Cold heading dies
5. Reduction / extrusion dies
6. Punches

### TOOLS FOR FASTENER INDUSTRY

1. Clamping tools
2. Knives
3. Header punches (plain, serrated, with letters)

### ROLLS FOR COLD AND HOT ROLLING

1. Oval reducing rolls
2. Round reducing rolls
3. Forming rolls
4. Profiling rolls
5. Ribbed rolls

## SPECIAL TOOLS

In addition to our standard products, our production program also includes special hard metal products that are applied in all kind of industry. Geometric shape of these tools depends on specific application conditions and varies in each individual case. Constructive solution is mainly defined by the customer, but our young and professional technical team can also make a proposal, based on the data supplied.

These tools can be made of hard metal or in combination with steel. Our professional staff pay special attention to the development of these tools, using years of rich experience in this field. The technology of making special tools depends on their geometric shape and can be very different.

Our equipment is specialized and adapted to this kind of production, so MTK Metal-komerc has the ability to produce very complex shapes.
